

APPENDIX A
STATEMENT OF WORK
“INFORMATION TECHNOLOGY SERVICES AND SUPPORT”

April 11, 2007

BACKGROUND

The Information Services Office (ISO) at the National Renewable Energy Laboratory (NREL) is responsible for managing NREL's Information Technology (IT) capability. NREL's technical environment consists of computing and networking facilities. NREL is currently using technologies in the areas of high-speed networking, client/server applications, global information dissemination, application programming and scientific programming. NREL relies on using resources like the Internet for information dissemination and remote collaboration activities.

OBJECTIVE

The objective of this effort is to attain Subcontractor services and support to assist NREL staff to complete technical projects within the ISO and other Administrative and Research Offices.

SCOPE OF WORK

Services, Skills, and Work Order

Due to a variable workload, NREL requires Subcontractor's services on an as-needed basis to provide IT services and support as further described below.

Subcontractor shall perform, as requested by individual NREL work order, some or all of the following IT services, which generally includes the following:

- Oracle Programming, DBA, Oracle Financials
- Connectivity (SQL), and Oracle tools (Developer 2000)
- Application Programming
- Project Leading/Management
- UNIX Administration, Programming
- Network Administration
- Database Administration, Programming
- Internet: Explorer, Mosaic, PERL, Javascript Programming
- HTML/SGML Programming
- Systems Programming
- C, C++ Programming
- Scientific Programming
- NT System Administration
- Desktop Troubleshooting
- Desktop Integration
- Technical IT Consulting

NREL has identified basic skill sets in Attachment 1, some or all of which may be required in the performance of the work orders.

No work shall be initiated without issuance of an NREL work order (Attachment 2) and only the Technical Monitor(s) is/are authorized to issue work orders.

Duration, Location, and Supervision

The duration of any specific work order shall not exceed one year. In addition, the duration that any individual Subcontractor employee may be assigned to this subcontract shall not exceed 2080 hours or one year, whichever is sooner.

All work shall be performed on-site at NREL's Permanent Site, Denver West Office Park, or National Wind Technology Center, Colorado, facilities. NREL will provide office space and supplies, computer equipment, telephone, and any other necessary materials required by Subcontractor's personnel to perform required services. In some instances, with NREL's approval, it may be acceptable for the Subcontractor's personnel to work from a remote site, however in those instances, supplies, computer equipment, and telephone will be supplied by the Subcontractor. And, the hourly labor rates in the subcontract will remain unchanged. Further, expenses are not reimbursable under the subcontract.

The Subcontractor shall be responsible for the direct supervision of its personnel and must provide a project manager who oversees its subcontracted personnel. The project manager does not need to be on site at NREL but must have a complete understanding of the work order and manage the subcontracting personnel for the duration of each work order. The Subcontractor shall work closely with the NREL Technical Monitor to ensure assignment of competent Subcontractor's personnel who have a complete understanding of work order requirements.

Reference and Background Checks

The Subcontractor will be required to conduct a reference and background check on each of Subcontractor's candidates that have been selected for assignment under this subcontract. The reference and background check must be completed prior to the physical assignment of each individual Subcontractor's personnel to the NREL site.

In addition to conducting the reference and background check, the Subcontractor is required to perform a thorough review of the reference and background investigative report. The Subcontractor must notify NREL of any findings that could adversely affect the Subcontractor's personnel's assignment to the subcontract work.

On an as-needed basis, NREL may request to review the reference and background investigative report of an individual Subcontractor's personnel identified to be assigned to work under this subcontract. Prior to releasing the reference and background investigative report to NREL, the Subcontractor shall obtain a signed release and consent from the individual Subcontractor's personnel.

Safety and Security

The Subcontractor shall be responsible for ensuring that the Subcontractor's personnel assigned to work on this subcontract:

- Satisfy all NREL access security requirements; and
- Complete an NREL Security Orientation and Safety Course.

Confidentiality, Patent, and Registration

The Subcontractor shall be responsible for ensuring that the Subcontractor's personnel assigned to work on this subcontract complete and sign an NREL "Confidentiality, Patent, and Registration" form.

Statement of Work
“Information Technology Services and Support”**

Skill sets that may be required in the performance of this work effort:

Application Analyst
Application Programmer
Computer Operator
Data Analyst
Database Administrator
Desktop Integrator
Desktop Technician
Documentation Specialist
Help Desk Technician
Network Administrator
Network Engineer
Network Security Administrator
Oracle Application Developer
Oracle Database Administrator
Oracle Programmer
Oracle Specialist
Project Manager
Scientific Programmer
Technical Trainer
Technical Writer
Telecommunication Analyst
Telecommunication Engineer
Telecommunication Technician
Unix Administrator
Unix Programmer
Web Designer
Web Developer
Web Engineer
Web Form Developer
